J. P. van Dijk (1950) got his degrees in Medicine as well as in Laws and Public Administration and is specialised in the field of Public Health. He is appointed as an Assistant Professor and Principle Researcher in the Department of Social Medicine in the University of Groningen. He lectures for medical students on the following topics: *The Organisation of the Health Care System in the Netherlands* and *Being Handicapped in the Netherlands*. Until the year past he was the teacher in Health Laws, a compulsory subject for medical students. The subject of his thesis was focused on the structural determinants of municipal health policy in the Netherlands. He is co-operating for a long period with the University of PJ Safarik. His collaborative research in the Faculty of Sciences UPJS focuses on *Inequality in Health in Adolescents* and *Health Promotion in Adolescents*. His collaborative research in the Medical Faculty UPJS focuses on *Chronically Ill and their integration in society*. Since the early nineties, he is participating in co-operation with universities in Central European countries. He was one of the founders of the Central European Network and of the KISH.
